Hà Nội

ABOUT ME

I am a web developer with a solid foundation in Java and Javascript. I also have good knowledge of Front-End (ReactJS, VueJS, AngularJS, NextJS) and Back-End (NodeJS, Express, NestJS, Spring Boot), and a basic understanding of database management systems such as MySQL, SQL Server, MongoDB, and PostgreSQL. I frequently use Postman, Docker, and GitHub in my studies and personal projects.

- Learning skill

WORK EXPERIENCE

FRESHER FULLSTACK DEVELOPER | Techwave Solutions Company

09/2025 - 04/2026

PROJECT:

Techwave_CMS

- **Description:** Internal CMS system for Techwave: manages posts, static pages, categories, users, and

settings/interface; includes login, dashboard, and content preview. Separate frontend-backend-MySQL architecture, implemented with [Docker Compose](#).

- **Role:** Leader
- **Responsibilities:**
 - First Responsibility: design & implementation [API REST \(NestJS\)](#), [ORM \(TypeORM\)](#), [JWT / Passport](#); build admin interface ([Next.js](#), [App Router](#)).
 - Second Responsibility: review code, standardize API data types between frontend and build process. / deploy (Docker).
 - Setup [Docker](#) (MySQL, service backend/frontend), variables, database healthcheck .
- **Technologies:**
 - Frontend: Next.js, React, TypeScript, Tailwind CSS, Radix UI, react-hook-form, Zod.
 - Backend: NestJS, TypeORM, MySQL, JWT, Docker.
 - Tools: Github, Postman, Cursor

Techwave_ecommerce

- **Description:** Full-stack e-commerce platform for a Vietnamese tech retailer, including a Nuxt storefront, Next.js admin dashboard, and Spring Boot API on PostgreSQL. Supports guest checkout with COD and online payments via **VNPay** and **MoMo**, with a two-phase flow: create a pre-payment order first, then create the official store order only after payment is confirmed through gateway callback/IPN.
- **Role:** Backend Developer
- **Responsibilities:**
 - Integrated VNPay and MoMo on Spring Boot: checkout API, HMAC signature validation, IPN/callback handling, and order creation after successful payment.
 - Built checkout and payment flow on Nuxt: gateway redirect, status polling, and success/failure result pages.
- **Tech stack:** Java 17, Spring Boot, Spring Data JPA, PostgreSQL, Spring Security, JWT, Maven, VNPay/Momo Payment API, Docker.
- **Team size:** 3 members

Landing Page Techwave

- **Description:** Marketing landing for Techwave (smart home, cameras, smart parking, solar), rebuilt from a static site using [Next.js \(App Router\)](#), [React](#), [TypeScript](#), and [Tailwind CSS](#), with framer motion animations. Production deployment [GitLab CI/CD](#) using [Docker Compose](#).
- **Role:** Frontend
- **Responsibilities:**
 - First Responsibility: Develop the homepage interface and content flow (Hero, customers, services, metrics, about us, processes, testimonials, contact), navigation bar/footer/floating buttons, animations, and responsive layout.
 - Second Responsibility: Configure App Router, SEO metadata, Interfont + Vietnamese subset, global styling; organize components, TypeScript, and ESLint to maintain code quality during build.
- **Technologies:** *Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Lucide React.*
- **Team size:** 2 members

FULLSTACK DEVELOPER |

Fullstack Developer – Part-time / Remote
Contract

08/2025 - 11/2025

PROJECT:

AI-powered Customer Support Chat System

- **Description:** A real-time web chat application between customers and support staff, with an admin dashboard, notifications, centralized status management, and AI integration (session summarization, sentiment analysis, etc.,

according to the README).

- **Role:** Full-stack Developer
- **Responsibilities:**
 - First responsibility: Design and implement the backend API (Express), Sequelize ORM with MySQL, and WebSocket (ws) flow for two-way chat and notifications.
 - Second responsibility: Build the admin interface (Vue 3, Vite), routing (Vue Router), status management (Pinia), API calls (Axios), and UI (Bootstrap).
- **Technologies:**
 - Frontend: Vue 3, Vite, Vue Router, Pinia, Axios, Bootstrap 5, Bootstrap Icons.
 - Backend: Node.js, Express.js, Sequelize, MySQL, WebSocket (ws), CORS, dotenv, Gemma 3 (Ollama), node-fetch, exceljs, xlsx
- **Tools:** Github, MySQL, Postman
- **Team:** 2 members

INTERN FULLSTACK – SCHOOL INTERNSHIP PROGRAM

| EcoIT Company

02/2025 – 06/2025

PROJECT:

Staff Management

- **Description:** Software for managing employee information and work schedules at the company.
- **Role:** Backend Developer
- **Responsibility:**
 - Support as Project Leader
 - Build and develop APIs
 - Collaborate with the Front-end team and support other team members
- **Technologies:**
 - Frontend: AngularJS.
 - Backend: NodeJS.
 - SQL: PostgreSQL.
- **Team size:** 4 members

HIGHLIGHT PROJECT

Kennek AI Chat System

02/2026 – 06/2026

- **Description:** AI web chat application (Kennek_AI): users log in/register (with **Google OAuth/Github OAuth**), organize project-based conversations, chat with 4 models (**Qwen3.5, Mistra, Qwen2.5-Coder, and Deepseek-R1**) via **Ollama** (SSE stream), search the web via **Tavily**, send messages with attached files, and extract content (PDF, Word, Excel, OCR, etc.) to use in context for the AI.
- **Responsibilities:**
 - Design and implement the Next.js chat interface (message flow, markdown, model selection, project/conversation sidebar), client-side middleware/authentication, and API proxy routes to the backend.

- Building a NestJS backend (REST, validation, session/JWT, cookie CORS), storing PostgreSQL data via Prisma, AI streaming (Ollama), integrating Tavily, and a pipeline for processing/optimizing attached content for the prompt.
- Integrate Visa and Mastercard payment gateways with the Stripe library.
- **Tech Stack:**
 - Frontend: Next.js, TypeScript, Tailwind CSS,.
 - Backend: NestJS, TypeScript, Prisma 6, PostgreSQL, Ollama, Tavily, Tesseract.js, RxJS, Bcryptjs.
 - Tools: Github, MySQL, Postman, Cursor
- **Github:** https://github.com/Ken290906/Kennek_AI

Kennek Profile

05/2026 - 05/2026

- **Description:** A modern, responsive personal portfolio website built with Next.js App Router. It presents profile, skills, work experience, projects, education, and contact in a single-page layout with animated UI, bilingual support (Vietnamese/English), command palette navigation, and mobile-friendly dock navigation. Deployed as a static site on Vercel with no backend.
- **Role:** Frontend Developer
- **Responsibilities:**
 - Designed and developed the full UI/UX: hero, 11+ content sections, responsive layout (mobile/tablet/desktop), green-themed design system, and ambient background effects
 - Implemented i18n (VI/EN toggle with localStorage), Framer Motion scroll/hover animations, smooth scroll, command palette, dock nav with active section tracking, and centralized content in TypeScript data files
- **Tech stack:** Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Lucide React, Vercel.

MobileWorld phone sales software

01/2025 - 08/2025

- **Description:** This is a complete content and sales management system (CMS) that communicates with each other via API. The system allows staff to perform core management tasks, track business activity through visual reports and charts, and interact with customers through real-time features.
- **Role:** Leader (Fullstack Developer)
- **Responsibilities:**
 - Design and complete the Discount Coupon and Invoice module.
 - Design and build a function to send emails to customers who have just made a purchase or created an account.
 - Integrate AI-powered consultation functionality using the **OpenAI** Key model.
 - Build Admin and Client Sales functions.
- **Tech Stack:**
 - Frontend: VueJS, Bootstrap, Pinia, html5-qrcode, SockJS, xlsx.
 - Backend: Java, Spring boot, Spring Mail, Cloudinary, Apache POI, iTextPDF, JasperReports, **openai-java**.
 - Tools: Visual Studio Code, IDEA IntelliJ, Postman, Github
- **Team size:** 5 members
- **Github:**
 - Frontend: https://github.com/phuocdm1702/Graduation_Project_Group_2_MobileWorld_FE.git
 - Backend: https://github.com/phuocdm1702/Graduation_Project_Group_2_MobileWorld_Ver2_BE.git
